PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/525,707	Applicant(s) FUNATSU ET AL.	
	Examiner David M. Naff	Art Unit 1657	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

A preliminary amendment of 2/24/05 amended claims 3, 4, 6, 9, 10, 13-17, 22-24 and 27-29.

Claims in the application are 1-29.

5 Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

10 In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

15 Group I, claim(s) 1-17, drawn to a cell filled device containing hollow fiber membranes containing a cell aggregate in each hollow portion where cells are formed in two or more layers, and to a hybrid organ containing the device.

20 Group II, claim(s) 18-29, drawn to a method of manufacturing a cell-filled device by obtaining a modified cross-section hollow fiber membrane, and injection a cell suspension into the hollow portion of the hollow fiber membrane, and to a method of manufacturing a hybrid artificial organ using cell-filled device manufactured by the method.

25 The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

30 The special technical feature of invention I is a method of manufacturing a cell-filled device containing a cell aggregate having cells formed into two or more layers.

35 The special technical feature of invention II is a method of making a cell-filled device by injecting a cell suspension into a hollow portion of a hollow fiber membrane.

Invention I does not require the special technical feature of injecting a cell suspension into a hollow fiber membrane as required

by invention II, and invention II does not require the special technical feature of a hollow fiber membrane containing a cell aggregate having cells formed into two or more layers as required by invention I.

5

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

10

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

15

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

20

25

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
